Capital Fireplaces Ltd was established more than 25 years ago to manufacture and supply high quality, elegant and affordable fireplaces crafted from natural materials.

Since then the company has expanded and developed to become one of the leading UK suppliers of a wide range of high quality fireplace products.

Capital Fireplaces' manufacturing and fabrication facilities are strategically located to utilise both the most advanced manufacturing technology available and the highest quality skills. Established long term relationships with quarries and foundries with highly efficient fabricators coupled with the unique experience and skills of the stone masons employed provide the backbone for the stringent quality and manufacturing standards we can achieve with our collection.

Equal time and effort has been spent over the last 25 years in sourcing and building the relationships with our material suppliers as has gone into designing the mantels and the choice of materials.

Vital to the success of Capital Fireplaces, is the close relationships that we have built with our fireplace dealers. The Capital Collection range is sold exclusively in the UK by a limited number of retail outlets. Our commitment to them is demonstrated by holding generous stock levels and providing them with a weekly delivery service. Ours is a strong partnership aimed at providing excellent customer service to bring you the very highest quality fireplaces as efficiently and effortlessly as possible.

All of our products are available to purchase from your local Capital dealer, they are able to give you advice on all aspects of your fireplace requirements from surveys to fitting. Visit our website to locate your nearest dealer;
www.capitalfireplaces.co.uk/fireplace-stockists/

Dedicated delivery team

All our products are delivered to our retailers using our own fleet of vehicles and drivers ensuring the components are handled in the correct way.

Our Vision

Our company vision is “to manufacture and supply beautiful, eclectically designed fireplaces to the highest quality standards using natural materials”.

We have stayed true to the same basic vision throughout the company’s existence. We are proud and passionate about our products, our designs and our people. We want you, our customers to share that passion, admire our fireplaces and love them as the centre piece of your homes and living areas.

Employing over forty people, we base our design and logistics centre near London, to service the UK market. Globally, we also have an extensive presence sourcing materials and finished products from both at home and across the world.

The Online Fireplace Studio

Our online Fireplace Studio allows you to create your very own fireplace designs.

Because there are so many different components involved in the making of a fireplace, it can be difficult to visualise it in its entirety. As you browse our brochure, you'll see that we try to showcase as many different designs as we possibly can, but it's not feasible to show you every combination possible. That's why we've introduced our digital Fireplace Studio, giving you the tools to design and more importantly, visualise your fireplace before reaching a decision you're 100% happy with.

You can quickly and easily design your own fireplace in minutes, customising your style with a range of options to create the perfect finish.

To picture how the fireplace is going to look in your home, you can upload a photo of your room to create the room set, or you can choose wall and floor colours that replicate those in your home.

Once you've set up your room, it's simply a case of flicking through our surrounds, inserts, baskets, stoves, chambers and fires to create a design that works for you.

You can even specify the type of hearth you'd like, and adjust the slip set and back panel opening as you wish.

Once you've completed your design, you'll be presented with a list of components included, you can choose to download this information or share it with a friend via email. We also recommend you print a copy and take it to your nearest Capital retailer for them to price for you.

We'll continue to add any new products to the studio, so be sure to keep an eye out. We hope you enjoy using the software, and feel free to share your designs on our Facebook or Twitter page.

Our Materials

Portuguese Limestone

Formed over 50 million years ago and responsibly quarried in Portugal. The characteristic darker veins on the light background, intermingled with fossils of plants and animal life all add up to the beauty and individuality of this natural stone. Blooms and whisps of fossilised leaves and other unique features are not considered defects but part of the experience.

Aegean Limestone

Sourced from the Eastern Mediterranean, our Aegean limestone surrounds are beautifully unique in character. Each mantel has its own individual fossil formation, veining and colour, so no two are the same. Our stunning cream coloured limestone is handcrafted into a variety of contemporary and traditional designs.

Corinthian Beige Stone

This beautiful, natural stone originates from the Western Mediterranean. The light beige background colour is highlighted with unique fossils and sedimentary veining. This stone will equally appeal to those who live in the city or countryside dwellings.

Carrara Marble

Quarried in the Italian city of Carrara, this stunning material has been used in the building of many of Rome's most remarkable buildings including the Pantheon. Every Carrara marble fireplace has its own distinctive appearance, but our mantels are generally white with fine grey or grey blue veining.

Liberty White Marble

This white marble from Dolomites is famous as the stone used to form the pedestal of the Statue of Liberty. It's a classical stone that when hand carved produces a selection of stunning modern and time-honoured designs. Our Liberty White fireplaces are generally snow white and consistent in colour, yet soft grey speckled veins can be present.

Timber

Our Timber surrounds are not only available in a variety of styles, they're available in any size and any colour, so you get complete control over the look and feel of your fireplace. Every one of our classic timber surrounds is handcrafted in Britain and they take on a whole new personality when you choose a colour that's right for your home.

Made To Measure

We strive to offer our customers a great deal of flexibility in terms of the size of their chosen fireplace design. That's why we've implemented a 'Made to Measure' service for a variety of mantels and suites.

No matter how small or large your chimney breast or room is, you can customise your fireplace to get the perfect size and each of the materials below is available as your chosen fireplace design;

- Aegean Limestone
- Portuguese Limestone
- Corinthian Beige
- Timber

Whether you'd like to change the overall size of your fireplace, make your shelf wider or reduce the rebate size, we can deliver a completely tailored service.

Every mantel in our brochure with the 'Made to Measure' label can be customised to your individual requirements, but we do recommend you

liaise with your local Capital Fireplaces retailer before placing an order, as they can help make sure you get the perfect fit. Our Capital dealers can provide technical advice as well as information on pricing, lead time, delivery and installation.

Widening or deepening your hearth or mantel

Whether you'd like your mantel or hearth to be deeper, wider, slimmer or thicker, we can meet your expectations with a tailored fit. Just remember, it's important to be clear on what you will be using the hearth for, as some hearths have to be a certain thickness or cut into sections and then re-joined to meet regulations.

Scaling your fireplace up or down

With our flexible made to measure service, we can change the size of your chosen fireplace design, meaning it really doesn't matter how small or high, narrow or wide your opening is.

For further information on this service, please contact your local Capital Fireplaces dealer by visiting;
www.capitalfireplaces.co.uk/fireplace-stockists

SOVEREIGN
— S T O N E —

The Collection starts by introducing our superior range of large 59” mantels.

Our Sovereign mantel designs have been influenced by historical source data and we go to enormous effect to match period design and manufacturing techniques.

The mantels are substantial in proportion and generous in the use of material whilst being versatile in application. They are suitable for large rooms with high ceilings that can accommodate an impressive mantel.

Available in Aegean Limestone and Corinthian Beige, each of the mantels shown has a 59” shelf width so these are perfect for rooms with a large chimney breast.

Each mantel offers a 36” x 36” fire opening and they naturally combine well when used with stoves, large solid fuel baskets and large portrait gas fires as the interior feature.

Our designers closely follow the latest trends in interior styling to allow the construction of the fireplace to be updated with some contemporary features and characteristics where we believe appropriate.

The Sovereign Stone range has been designed specifically to complement certain room sizes, certain fireplaces and certain fireplace openings.

Our timber surrounds are not only available in a variety of styles, they're available in any size and any colour, so you get complete control over the look and feel of your fireplace.

Timber Mantels

Every one of our classic timber surrounds is handcrafted in Britain and they take on a whole new personality when you choose a colour that's right for your home. Whether you have bright painted walls, artistic wallpaper or one particular shade of grey throughout your home, our timber surrounds can make a real statement.

We've developed this bespoke collection to marry traditional designs with modern colours, we also wanted to give our customers the freedom to scale the fireplace up or down depending on the size of their room or chimney breast.

Like all of our stone and marble fireplace mantels, our timber surrounds can be purchased from your local Capital Fireplaces dealer, who can provide invaluable advice and expertise on all areas, including interior design, pricing, installations and aftercare.

Made to Measure

Each of our fire surrounds can be scaled up or down, so if you come across a design you love, but find it doesn't fit your room, all you need to do is inform your local retailer of the size you require.

Our timber surrounds have an adjustable rebate as standard. You can choose between a 1" or 3" rebate to best suit your particular application.

All of the timber mantels featured are individually handmade, and therefore slight variations in size are to be expected.

Adding a matching mirror

We know that with such a huge range of colours to choose from, it can be difficult to find a mirror that matches the colour of your fireplace. That's why we've produced our very own, the Ashdown and it's available to buy in the same finish as your new timber fireplace.

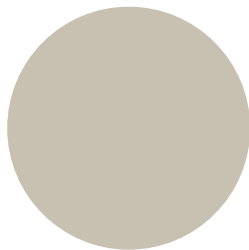

The Ashdown's simple design makes it a nice fit for modern and traditional rooms and it's the ultimate complement for your bespoke timber surround.

Choosing a colour

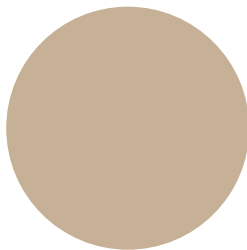

Below you'll discover our selection of standard colours for our timber mantels, however if you have a particular shade in mind don't worry, all of our timber surrounds can be colour matched to your individual requirements.

If you'd like a tone that corresponds with your existing furniture, or you fancy a contrasting colour that really stands out from your walls, our colour matching service can help.

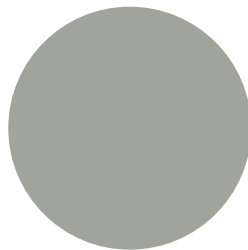

Our shades of oak can give your fireplace a more classical look, and you can choose between Medium and Clear Oak, whilst English Walnut and Cherry are both fine options if you fancy a natural tone that's slightly warmer.

**provident &
greencast
ranges**

High Efficient Gas & Electric Fires for Cast Iron Inserts

The Provident & Greencast ranges have been designed to deliver efficient gas and electric fire options within more traditional and sometimes ornate cast iron fireplaces.

We have sought from the design stage to combine the two critical components, the fires and the cast iron surrounds, in unison to deliver an aesthetically pleasing integrated appliance that offers you a choice of gas and electric fires and one of the best fuel efficiencies for any integrated appliance on the market.

provident

Our Provident Back Panel can help you create a fireplace that's beautifully modest and highly efficient, making it a fine centrepiece for any modern or traditional surround.

The Provident Backpanel, available in either black or highlight finish were specifically designed to support our arched Provident Fireframes.

By integrating the Back Panel and the Fireframe we are able to house more highly efficient gas and electric fires. Closing off the unit and adding a canopy to the Fireframe means we are able to increase the efficiency of the fires and ensure that the heat output is going into the room and not up the chimney.

Fireframes

Our Provident fireframes are designed to complement the backpanel, bringing the timeless arch to a gas or electric fire. You can choose between a black or highlighted finish to best suit your home décor and each can house the high efficiency gas and electric fires described on page 137. By designing in a canopy to the Fireframes we are able to achieve a significantly higher efficiency rating.

Also available in Black

HE Open Fronted Convector

Greencast Inserts

The Greencast range of castings was designed to achieve greater heat output from our gas and electric fires when used with traditional castings.

- HE Wandsworth Highlight Arch Insert
- HE Claydon Decorative Highlight Arch Insert
- HE Heybridge Highlight Tiled Insert with a choice of Tiles

By incorporating a canopy to the arches and making the canopy larger than normal on the tiled insert we have been able to use fires with greater efficiency.

The fires available for use with the Greencast Inserts are listed on page 137.

No chimney or flue?

We can even offer a Balanced Flue Gas Fire option in these situations.

Cast Iron Fireplace Inserts

Our Cast Iron Inserts have been inspired and carefully copied from original designs. Every effort has been made to replicate those originals as closely as possible.

Over the next few pages, you will find a wide selection of arched inserts, tiled inserts and fascia panels to suit all tastes.

Combination Fireplaces

Cast Iron Combinations grew in popularity in the Victorian period. They were seen as perfect fireplaces for smaller, terraced houses or for use in bedrooms or in situations where space was at a premium and there was not sufficient room for a stone mantel and a cast iron fireplace.

By integrating the shelf with the cast iron a complete fireplace could be achieved. The same principle applies today. Combinations are popular for smaller fireplace openings or to add decoration to a room. They are also cost effective whilst the intricate designs and finishes available mean they are a beautiful option.

Many of our cast iron combination fireplaces come with the option of three finishes; black, highlighted and full polished, and like our cast iron arches, they're suitable for electric, gas or multi fuel fires.

Our cast iron fireplaces are available to buy from any approved Capital Fireplaces retailer, and you can locate your nearest showroom by visiting; www.capitalfireplaces.co.uk/fireplace-stockists

Realistic Gas Fuel Beds

Whisperglow Electric Flame Effect

High Level Slide Control for ease of use

Programmable Remote Control on all Designline Fires

Capital Fires

Choosing a fire that's right for your home.

When searching for a new fire, it's important to understand that the type of flue you have will often influence your choice. We have a comprehensive range of fire designs suitable for all flue types.

Our classic and contemporary fires can complete the look of a fireplace and they've been developed to deliver efficient heating, beautiful aesthetics and fascinating flame patterns.

Inset Fires

Our Gas Inset Fire range has been specifically designed to offer a wide choice of trim options to compliment the decor and style of your room. The range also offers great flexibility when it comes to installation so whether you have a traditional chimney or a more modern flue we will still have a fire to suit your needs.

Depending on the fire, you can also choose between coal and log effect fuel beds and most of our gas fires include high level slide control as standard, so you can easily light your fire and adjust the height of the flames.

Designline Fires

Contemporary glass fronted gas fires with large viewing windows and realistic log fuel beds make these fires a striking feature in any room. Supplied with a programmable remote control hand set as standard.

If you'd like to learn more about our designs or get advice and information relating to your individual requirements, we strongly recommend you visit your local retailer. They can provide advice and information on compatibility, pricing and installation requirements. To find your local Capital retailer, simply visit www.capitalfireplaces.co.uk/fireplace-stockists.

Fire Warranty for Added Peace of Mind

Our Decorative Hot Box and Convector Fires are covered by a 3 Year Warranty from date of sale and our Lectro and Phantasy Electric Fires have a 2 Year Warranty. Terms and Conditions apply, please visit our website for further information.

For more information about our fires, please see the Capital Fires & Suites brochure.

DESIGN LINE

- FIRES OF STYLE -

Introducing our new range of contemporary, superior Designline gas fires. Extremely efficient with a classic log fuel bed, these stunning fires not only provide comfort and warmth, they can also make a stylish statement in your home. For more information and to browse the full Designline range, please see our Capital Fires & Suites brochure.

Inset Gas & Electric Fires

Pulsar Decorative Gas Fire ^{NEW}

The small and discreet canopy offers a more open view of the flickering flames on this full depth gas fire. The option of a log fuel bed is a nice alternative to the standard coals and complements the impressive flame picture. High level slide control makes the operation of this fire hassle free.

Omega & Matar Gas Convector Fire

Suitable for Class 1 and Class 2 flues, our open fronted gas convector fire can add a touch of charm to any fireplace suite, and there are a huge range of fireframes to choose between. It uses modern technology to deliver traditional warmth, whilst slide control offers a quick and easy way to adjust the flame height.

Ascella Glass Fronted Gas Convector Fire

Extremely efficient with a classic coal effect fuel bed, these fires take advantage of a glass front, delivering a high glow in the ceramic fuel beds at very low settings. One of the main advantages with these fires is that they prevent heat from the room being lost up the chimney. Slide control as standard.

Stratos Decorative Gas Fire ^{NEW}

A mid depth fire that offers a realistic coal fuel bed but is still suitable to fit most fireplaces. As with all our other fires, the Stratos is designed to fit our full range of fireframes and trims and comes with slide control as standard.

Corvar Slimline Decorative Gas Fire ^{NEW}

Whilst still retaining an attractive coal bed this slimline fire fits into most chimney and flue situations where depth might be at a premium. The small discreet canopy and slide control operation are added benefits.

Regulus Decorative Gas Fire

With five trim and fret finishes to choose between, the Regulus fire is a stunning finishing touch to your stone or marble fireplace. Like all of our fires, an air vent is not usually required, whilst you get a choice of fuel bed; you can stick with the standard coal, or upgrade to pebbles.

Lectro Electric Inset Fire

A fine option for homes without chimneys, our electric fires are incredibly efficient, making good use of the heat produced. Even when the heat is switched off, you have the option of a bright flame flickering in the background, and this setting uses the same amount of energy as a standard light bulb. The Lectro is available in manual or remote control.

Phantasy Electric Inset Fire ^{NEW}

With its almost silent flame effect the Phantasy electric fire uses modern LED technology to produce a realistic and colourful flame picture. Remote control and thermostat come as standard. Electric fires enable you to have year round flickering flames with heat only when you choose.

Dimensions

Firebaskets, Combinations & Inserts

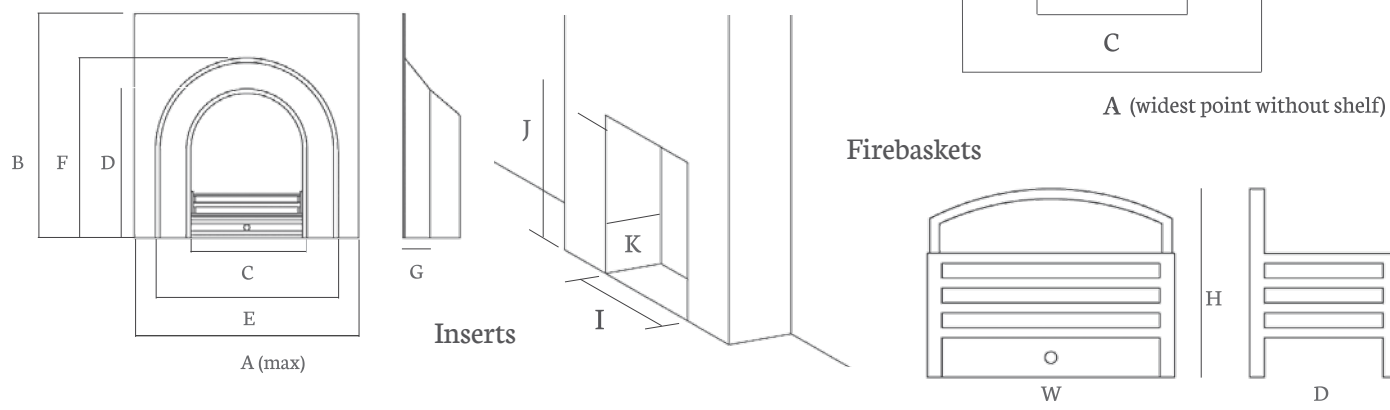

All products (except chrome finish) are suitable for burning solid fuel, however polished and highlighted products may tarnish. Only burn small fires to start with in order to temper the cast iron.

Before committing to a fireplace, please discuss your particular installation with your retailer who will provide expert advice and carry out a survey.

All dimensions are provided as a guide only and are subject to a tolerance of $\pm 12\text{mm}$.

It is normal for tiles to craze over time.

Most fires have a remote control option, please ask your retailer.

A man and a woman are sitting on a light-colored sofa, looking at a laptop. The man is on the left, wearing a plaid shirt, and the woman is on the right, wearing a white top and blue jeans. The laptop screen shows a website with a fireplace as the main image. The background is a bright, airy living room with a white chair and a large sofa.

Find your local Capital Retailer

All of our products shown in this brochure are available to purchase from your local Capital retailer, they are able to give you advice on all aspects of your fireplace. Simply visit our website to locate your nearest retailer at; www.capitalfireplaces.co.uk/fireplace-stockists

Recent changes in legislation have been made in an attempt to reduce the emissions of all solid fuel burning appliances. As such solid fuel Baskets/ Kits, Combination Fireplaces and Cast Iron Inserts should not be used as local space heaters in order to reach and maintain a certain level of human thermal comfort. Whilst the actual heat output of these products has not changed from previous years they should now be viewed as for decorative use only.

Due to the nature of the materials and appliances used within this brochure, actual finishes and colours may vary slightly. Flames shown within the fires may also vary depending on gas type, fuel quality and the performance of the flue or chimney. For information on aftercare and maintenance, please visit our website: www.capitalfireplaces.co.uk

Capital Fireplaces Ltd reserve the right to change specification or de-list products at any time.
